Hala Althiabi

Saudi Arabia

PROFESSIONAL PROFILE

As a motivated Software Engineering graduate with practical experience in research, data analysis, and UI/UX design, I possess strong analytical, problem-solving, and technical skills. I specialize in designing user-centered interfaces using Figma, analyzing and visualizing data, and contributing to innovative solutions that improve processes and support decision-making. I am committed to delivering high-quality results while integrating technical expertise with organizational objectives.

PROFESSIONAL EXPERIENCE

The Institute of Hajj and Umrah Research | Saudi Arabia

Researcher Trainee | June 2024 – August 2024

Role Overview

Conducted research on Hajj and Umrah challenges, analyzed existing solutions, and contributed to the development of innovative approaches to improve processes and address identified issues.

Key Achievements

- Identified and defined critical problems related to Hajj and Umrah operations for focused research.
- Evaluated and compared existing solutions, highlighting gaps and areas for improvement.
- Developed a research-based solution, contributing to potential improvements in Hajj and Umrah management.

Core Responsibilities

- Conducted literature reviews and data analysis to understand prior solutions and their limitations.
- Collaborated with the research team to design and propose effective interventions.
- Documented findings and presented actionable recommendations for implementation.

ACADEMIC BACKGROUND

Umm Al-Qura University | Saudi Arabia

Bachelor's Degree in Software Engineering, Computer Information Systems (CIS) | August 2020 – November 2024

CERTIFICATES

- Data Analyst | Google Developers Group | March 2025

COURSES

- Intermediate SQL.
- Fundamentals of Visualization with Tableau.
- Communication Skills in Dialogue.
- Soft Skills.
- Power BI.
- Data Analysis Bootcamp.
- Swift.

VOLUNTEERING

- Volunteer | Data Entry Officer | Safe Medical Care Org (SMCO).

SKILLS

Job Expertise:

- Research & Analysis.
- Data Visualization.
- UI/UX Design.
- System & Process Improvement.

Strategic & Analytical Thinking:

- Critical Thinking & Problem Solving.
- Risk Assessment & Decision-Making.
- Process Optimization.
- Data-Driven Strategy Development.

Technical & Productivity Tools:

- Microsoft Office Suite.
- Power BI & Tableau.
- SQL & Swift, Python & Java
- Figma.

Project & Team Management:

- Team Collaboration.
- Task & Time Management.
- Project Planning.
- Goal Achievement.

LANGUAGES

- Arabic (Native).
- English (Intermediate – B1).
